

WAZIR MUHAMMAD MUZAMMIL

- Opposite Gul Plaza ImamBragah Road , Rawalpindi
- 03478048455
- itzmuzu@gmail.com

SUMMARY

Software Engineer graduate with solid experience in MERN Stack (MongoDB, Express.js, React.js, Node.js) development. Skilled in building responsive web applications, RESTful APIs, and handling end-to-end project lifecycles. Proficient in Git, problem-solving, and passionate about writing clean, efficient code to deliver real-world solutions.

EDUCATION

Bachelor of Science in Software Engineering
Mirpur University of Science and Technology
CGPA : 3.1

Sep 2020 - Oct 2024

EXPERIENCE

- | | |
|--|----------------------|
| CodeCrafters Hub, Pakistan Lahore | Nov 2024 – Jan 2025 |
| <ul style="list-style-type: none">Built responsive dashboards using React.js and Tailwind CSS.Integrated APIs to fetch and display real-time data.Improved front-end performance and cross-browser support.Helped visualize data through charts and tables for better insights. | |
| NTC National Telecommunication Corporation, Pakistan Islamabad G5-2 | May 2025 – July 2025 |
| <ul style="list-style-type: none">Helped monitor systems and check network activity.Assisted with data backups and keeping records safe.Supported daily tasks to keep the data center running smoothly. | |

PROJECTS & ACADEMIC WORK

FYP-Multi disease detection in Apricot fruit using Deep learning

- Tools:** Python, TensorFlow, Keras, OpenCV, Jupyter Notebook
- Developed a custom CNN model for multi-disease detection in apricot fruits.
 - Utilized YOLOv8 for object detection and classification with a dataset of two disease classes. Implemented and trained the model using Python, achieving high accuracy in detection.

E-Learning Website

- Tools:**React.js, Tailwind CSS, Framer Motion
- Built a responsive multi-page educational platform
 - Implemented animations using Framer Motion for a modern UI experience
 - Applied custom components and reusable design elements and designed mobile-friendly layouts using Tailwind's utility classes

Todo App

- Tools:**React.js , Redux Toolkit
- Developed a task management app with add, delete, and update functionality
 - Used Redux Toolkit for centralized state management
 - Created modular components and applied conditional rendering

Weather App

- Tools:** Next.js | OpenWeatherMap API
- Integrated third-party weather API to fetch real-time weather updates
 - Built dynamic UI to display city-based temperature, humidity, and forecast
 - Handled API errors and loading states with clean UI feedback

YouTube Clone (Backend Only)

- Tools:** Node.js , Express.js , MongoDB , Multer ,Cloudinary
- Created RESTful APIs for video upload, retrieval, and metadata storage
 - Used Multer for handling multipart form data (video uploads)
 - Integrated Cloudinary for secure media storage and optimization and designed MongoDB schema for user data, video metadata, and upload logs

TECHNICAL SKILLS

- Web Dev Basic(React js , Tailwind CSS , Node js , Express.js) and Next js
- Networking Basics (IP addressing, LAN/WAN, routers & switches)
- IT Support (System installation, software troubleshooting)
- Programming: C++, Python, JavaScript(React , Node ,Express) , Typscript
- Tools: MS Office, Wireshark, Packet Tracer , Visiual Studio

CERTIFICATIONS

- introduction to Cybersecurity([cisco](#))
- Front-end development ([Coursera](#))
- Advance React Course ([Coursera](#))
